Introduction

An innovative app called JomCuti !! makes vacation planning in Malaysia easier. Users may easily and quickly plan itineraries, book hotels, and find intriguing vacation places using JomCuti. This app offers a plethora of helpful information to make your journey more meaningful and pleasurable, such as user reviews, travel guides, and exclusive deals. JomCuti is the ideal travel companion, whether you're organising a lonely, romantic, or family vacation. It will make sure your journey is enjoyable and trouble-free.

Problem Statement

1) Lack of Centralized Information

Finding trustworthy and thorough information about vacation spots, lodging options, and activities in Malaysia can be challenging for many visitors. To solve this, JomCuti offers a single platform that has all the relevant information, customer reviews, and trip guides.

2) Difficulty in Finding Best Deals

Due to their dispersion across many channels, travellers frequently lose out on the finest offers and promotions. To make sure consumers can quickly locate and take advantage of the finest prices for their travels, JomCuti compiles the most recent promotions and special offers.

3) No Comprehensive Packages in Other Apps

Many travel applications force users to manually put together their travel arrangements because they only offer partial or no vacation packages. JomCuti offers comprehensive vacation packages that include lodging, activities, and itineraries, streamlining and simplifying the process of planning a trip.

Objectives

To centralise travel information, make vacation planning easier, provide the greatest offers, encourage local travel, guarantee travel safety, make document management easier, offer all-inclusive vacation packages, and improve user experience for tourists worldwide.

Application explanation by activity/screen, coding and resources

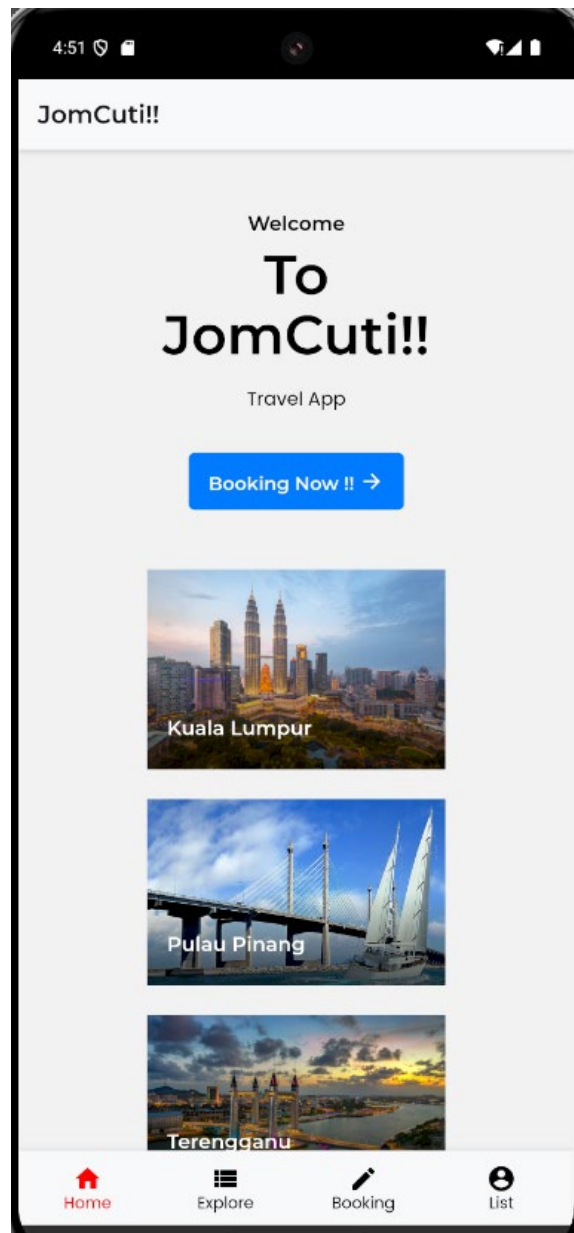

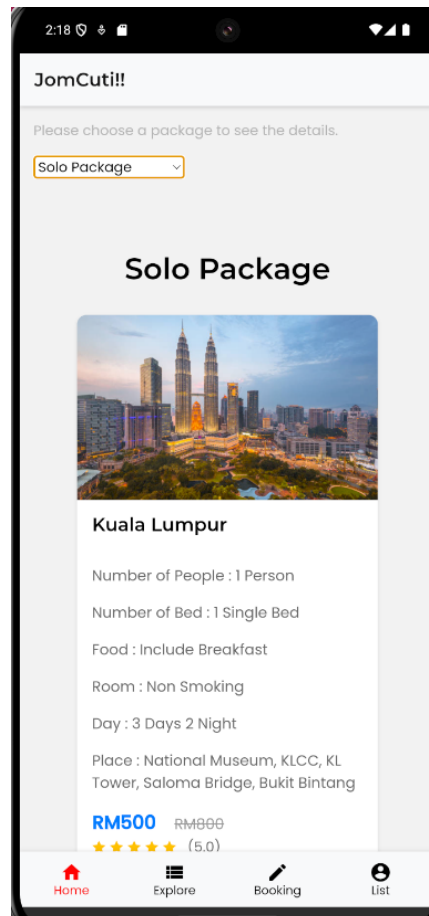

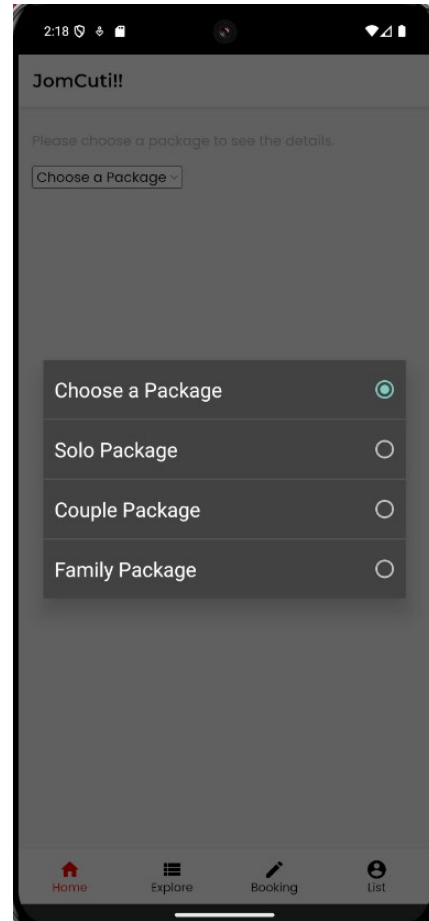

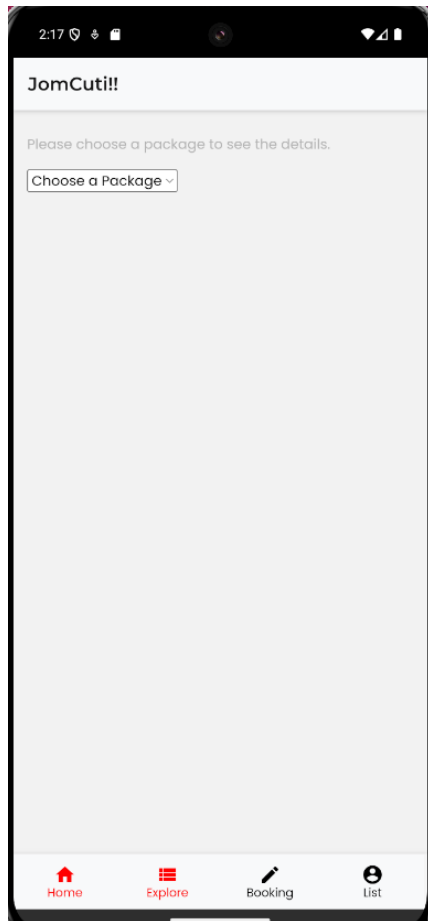

Figure 1 : Home page

This is the home page of the JomCuti!! application. Users can scroll down to see the list of available countries or states. In addition, users can also use the search function to find a specific destination, view detailed information about their chosen destination, and make reservations directly through this application.

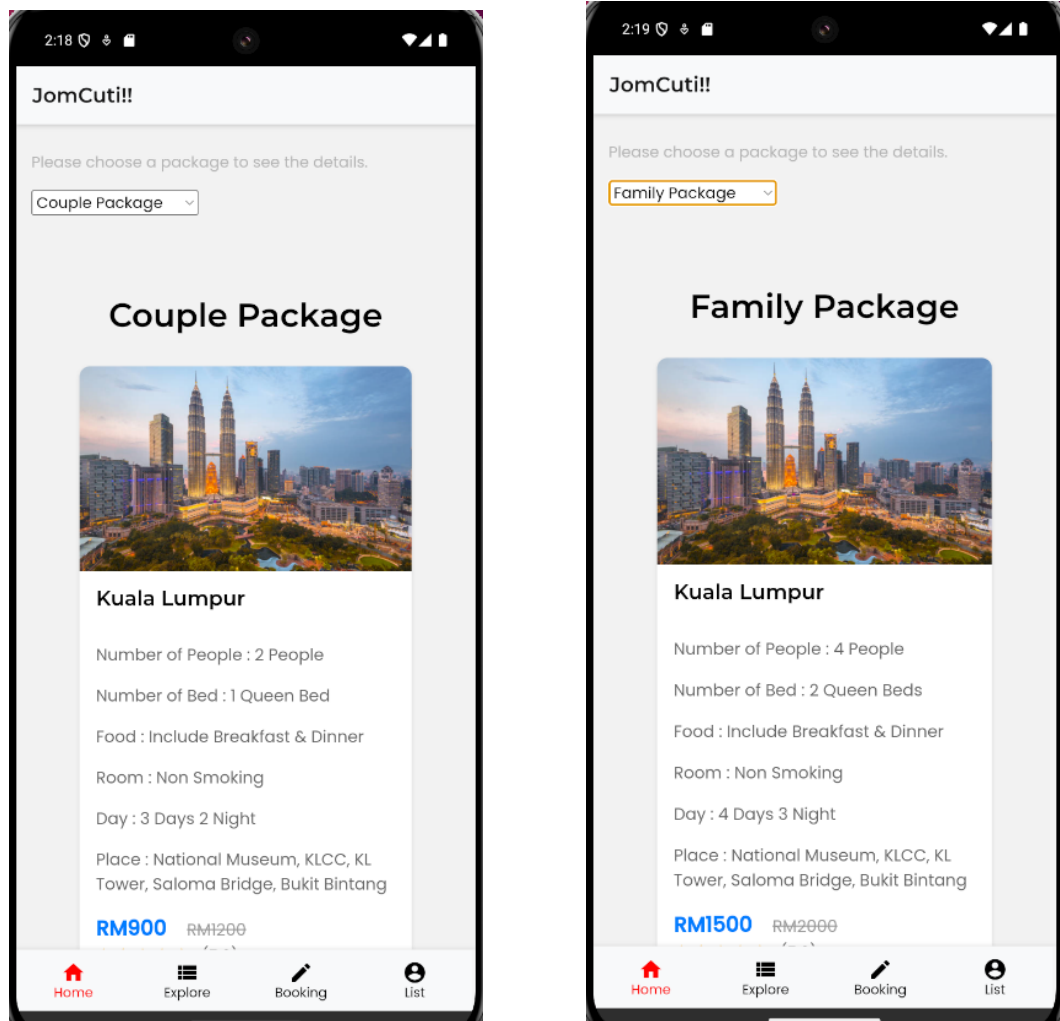

Figure 2 : Explore page

The explore page shows all places where all users can view and book their desired vacation destination. In addition to that, users can also get generous discounts that are given to users.

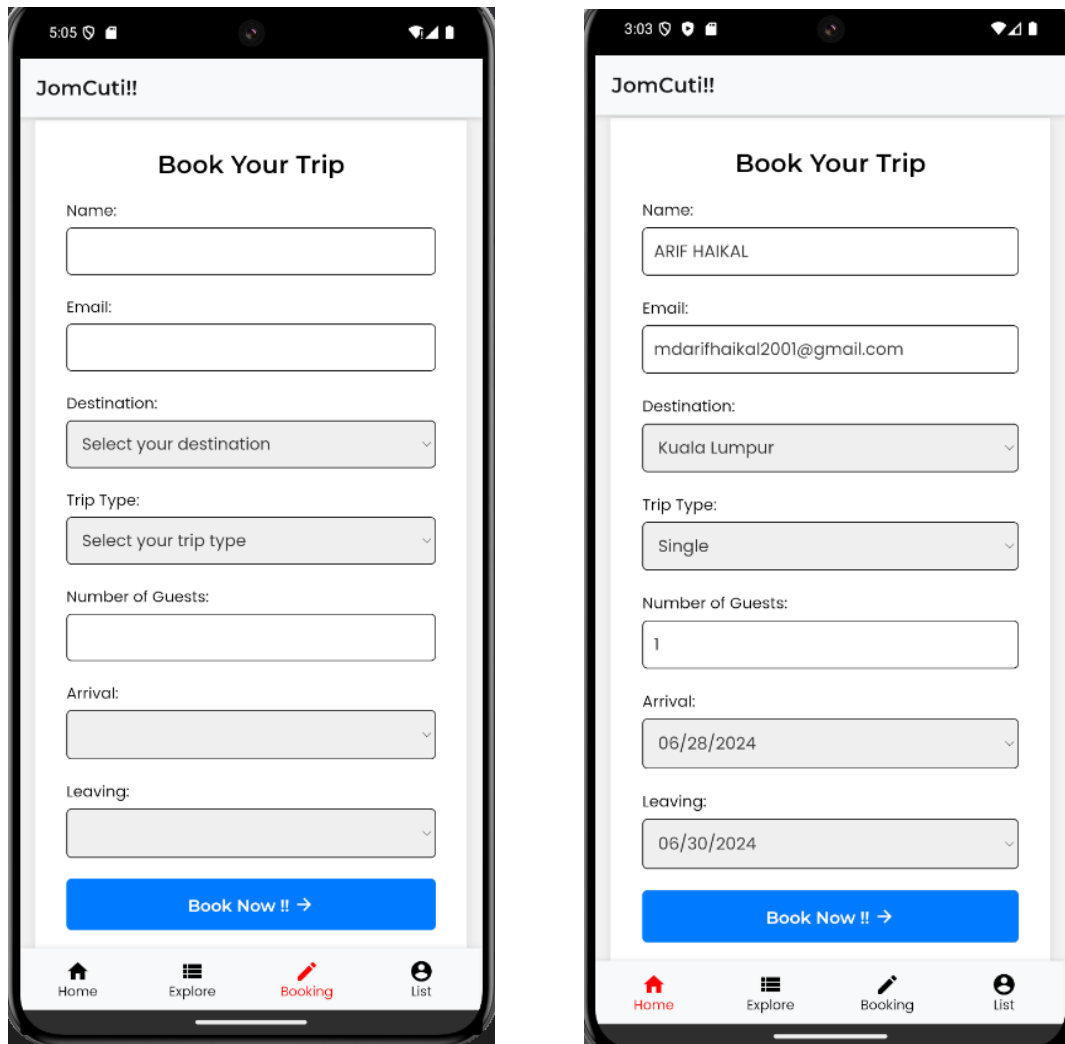

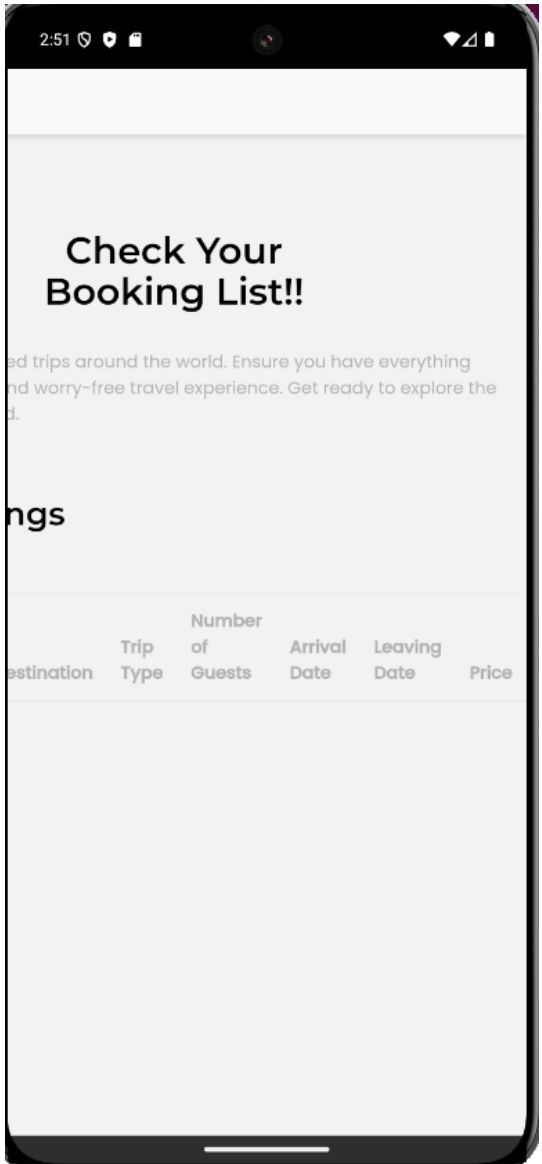

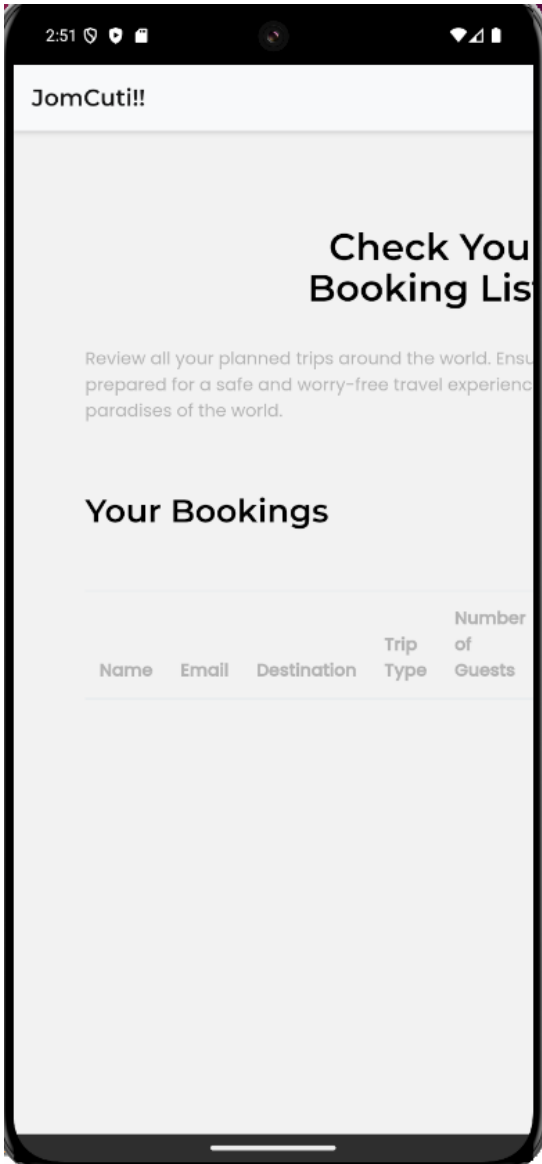

Figure 3 : Booking page

On this page, users can select their preferred destination, choose travel dates, and fill in personal information. Afterwards, users can check their booking details to make sure everything is correct before proceeding with payment. The site also offers a variety of safe and convenient payment methods.

On Phone :

On Browser :

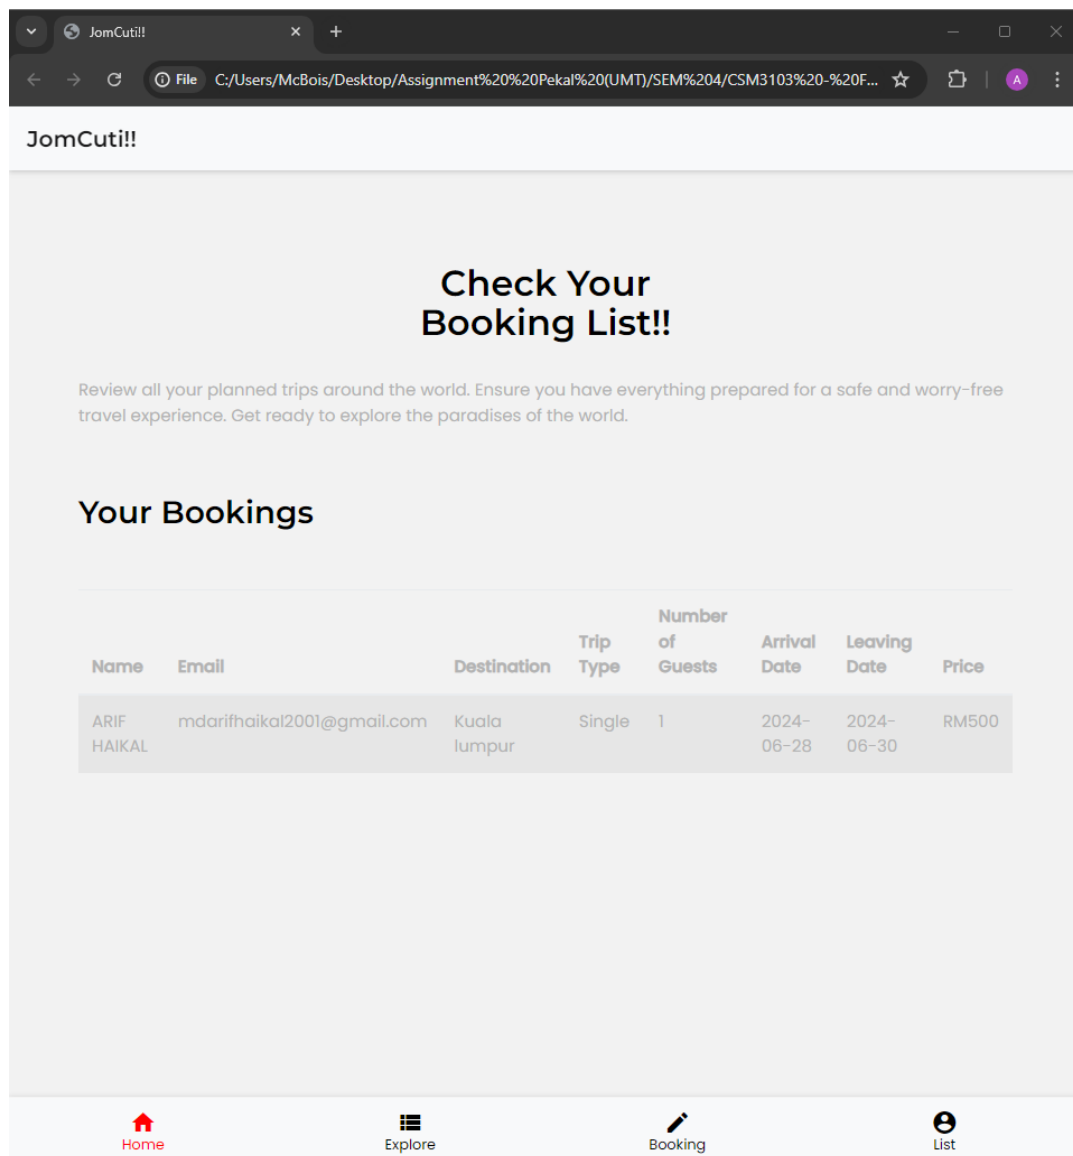

Figure 4 : Booking List page

On this page, users can see all the reservations they have made. Each booking will be listed with important details such as destination, travel date, booking status, and payment amount. This site makes it easy for users to monitor and manage all their bookings in a more efficient and orderly manner.
